

“A Message To All Healthcare Professionals”

I just wanted to share this important message with you all. We are able to help ourselves through this tough season by being thorough with doing what we can do, while praying fervently over those things we cannot do or fix. Do your ministry and focus on helping those you can help. That helps us remember that we are powerful. We have power, but it is limited to the moments that are ours. Trusting God when it is **not** our moment of power is the way of the mature.
